Faculty Mentor: _____

Title:

Research Question:

Background:

- Describe here what is known about your research question and how your work will add to the body of knowledge.
- If your project idea has been done before in another setting, explain the value of replicating it at the SRFC.
- Include at least three to five references of articles you read to place your research idea in context.

Specific aims:

- Detail here the measurable outcomes of your research

Methods:

- Study design(quantitative, qualitative, mixed)
- Source population
- Inclusion criteria/Exclusion criteria
- Variables to be measured

Analysis Plan:

- Descriptive (Includes counts, percentages and other descriptive statistics – Means, medians, modes, ranks, incidence, prevalence, etc.)
- Analytical quantitative (Whether you will use a test of hypothesis, any measures of association, regression, etc.)
- Qualitative analysis (unitizing, coding, generating themes, etc)

Significance:

- Indicate how your project will help the SRFC's patients or the clinic itself.
